DGL Consulting Engineers, LLC Opens Maumee Office

Maumee, Ohio, September 23, 2006 – DGL Consulting Engineers is proud to announce the relocation of its professional engineering and survey business to 3455 Briarfield Boulevard in Maumee, Ohio. The new facility is approximately 6000sf with a layout that is supportive of the teamwork and collaboration that is required of a majority of the projects that the firm completes. In addition to the open floorplan within the office, its location is centrally located amongst DGL’s current service area and conveniently situated just seconds from the Dussel/Salisbury Road Interchange with US-23/I-475.

“Our new office has all of the features that DGL was looking for as we implement our strategic plan. Additionally, the convenient location offers easy access to Toledo’s roadway system that results in shorter commutes for both our customers and employees. Our staff also enjoys the diversity of businesses that satisfy a majority of their daily needs.” said Steve Way the firm’s Managing Director.

DGL Consulting Engineers, LLC is a consulting engineering firm located in Maumee, Ohio, that specializes in all aspects of the transportation/traffic engineering industry, as well as civil and structural engineering to support private institutional/industrial/commercial/residential development throughout the tri-states region. Founded in 1926, DGL is proud of our 80 year history of providing creative solutions to our customers’ most difficult engineering challenges. For more information: www.dgl-ltd.com
