

DGL Consulting Engineers, LLC

Project Name:

SR-2 (Airport Highway) Improvement
LUC-2-14.210

Owner:

ODOT, District 2

Construction Cost:

\$9,200,000

Description:

State Route 2 (Airport Highway) is the primary east-west access route to Toledo Express Airport from the City of Toledo carrying 45,000 vpd at I-475. A series of improvements to this route resulted in it being a four-lane highway from Reynolds Road in the City of Toledo to the airport. DGL Consulting Engineers was contracted to prepare construction documents to implement several of the access management recommendations made in The Toledo Express Airport Highway Access Concept Study commissioned by ODOT and completed in 1995.

Recommendations from the concept study that were incorporated into DGL's construction documents were:

- Operating plans (signalization) for the Holloway Road, McCord/Perrysburg-Holland Road and Spring Meadows Drive intersections.
- Acquisition of additional right-of-way and construction of a six lane divided highway between Holloway Road and I-475.
- Airport Highway ramp termini improvements at the I-475 interchange

Highlights:

- Complex MOT due to high traffic volume and adjacent commercial land usage
- Vertical profile adjustments to accommodate cross traffic at intersections
- Four span steel bridge replacement within the I-475 interchange
- Construction completed 9 months ahead of schedule
